

RE: Services by SJ Construction Consulting, LLC

Dear NUCA Executive Director,

Scott Jennings is a new NUCA member (NUCA of Hawaii) and is a Principal at SJ Construction Consulting, LLC (SJCC).

As a 25-year veteran of underground construction, from field engineer to owner, SJCC's sole mission is to assist contractors in improving *their* business. He's got a great client list. Check it out on his website at: www.sjcivil.com.

Scott and his firm are offering training on HCSS' HeavyBid software for NUCA member firms across the country.

I encourage you to talk with him when he contacts you.

You might want to consider partnering with Scott to offer your members excellent industry training and, in the process, provide your members with a valuable added benefit.

Although NUCA does not endorse any member firm's services over another, we do encourage doing business with NUCA member firms.

Sincerely,

Jim Stepahin

Director of Education and Training

National Utility Contractors Association (NUCA)
